2.1 Logging Class Reference

Public Member Functions

- void [begin](#) ()
Begin with default loglevel and baudrate. (LOG_LEVEL_DEBUG, 115200L)
- void [begin](#) (int level, long baud)
Begin with user selected loglevel and baudrate.
- void [setLogLevel](#) (int level)
Set the loglevel at runtime.
- void [Error](#) (char *msg,...)
Output an error message. Output message contains ERROR: followed by original msg. Error messages are printed out, at every loglevel except 0.
- void [Info](#) (char *msg,...)
Output an info message.
- void [Debug](#) (char *msg,...)
Output a debug message.
